Expanded edition which includes track maintenance grids along the bottom portion of pages, with notes pertaining to what years which portions of track were worked on, rail weight info, etc. ...................................................... (WI,MI,IL,MN,Ont.)..291p...$42.

## DOCUMENTS ON CD - ROM

**Anything from Track Profiles, Signal Plans, and other Diagram Books which have been converted into FULLY INDEXED CD-ROM's. No digging through a large book to find a particular station of interest, and these can be stored in a fraction of the space. Stations are named and indexed per page, fully searchable! Pages are presented in either PDF or GIF format, in extra large detail. CD-ROM's are labeled, and presented in plastic jewel cases.**

## Track Charts & Profiles (on CD):

## Interlocking Diagram Books (on CD):

**MILW 1900-31 SYSTEM Lines** ........................................ (Wli)...355p...$38.

## VERNE BRUMMEL RAILROAD SLIDES ( ON SLIDESHOW CD-ROMS )

**Avid railfan, railroad historian, and railroad photographer since the early '70s, Verne Brummel offers his extensive collection of railroad slides for sale in this ongoing series of Slideshow CD-Roms (and Slide Duplicates, which may be ordered from any slide image you see on any of these CD-Roms after you order). Choose from the volumes listed below, CD-Roms filled with HUNDREDS of slides from the 1970's, a revealing look back at some of the greatest trains, locomotives, depots, and rail lines in modern railroading history, all professionally color corrected, cleaned and restored, presented in easy-to-view slideshows. These are EXTREMELY high quality digital transfers of slides, performed on top-of-the-line equipment. All CD-Roms have been created using professional slideshow software. For sample photos from the CD-Roms on the Internet, go here... http://trainsite.mysite.com/slides.html**

**More details:** Typical example of how one of the CD's will work: Simply insert a CD-Rom, and it will auto-start, taking you to a menu from which you can choose what part of the CD you would like to view first. Click on your selection of interest, and while viewing the slideshow, when you "right-click" your mouse, you have the options of toggling the captions "on" or "off", and to "pause" at certain images, among other options. Once that slideshow is finished, you are taken back to the main menu to choose another. If for some reason the CD does not auto-start, click on the CD-Rom icon in your "My Computer" folder. Due to the nature of CD-Roms, there will be no refunds. If for some reason a CD will not work on your system, try it on another computer before returning it. If it runs fine on the second computer, your computer is at fault, and may need to be upgraded. If it does not run on either computer, this means the CD may be at fault, and you may return it for an exchange of the same CD Volume within 30 days of purchase. Feel free to e-mail with any questions. The CD's listed for sale are provided "as-is", without any express or implied warranty, except where noted above. **Recommended System Requirements:** Windows 98 thru 10. Your disc drive must be able to run the "CD-R" or DVD+R formats. Most newer drives will be able to play them without trouble. While only recommended for Windows 98 and above, it will also run on the Mac OSX, but only if you have installed a program capable of running Windows programs. The CD should also run on Linux with a program called "Wine". Will not run on TV set-top DVD players. **For details about the contents of each CD-Rom, please visit: http://trainsite.mysite.com/slides.html**

**VOLUME 1:** Along The South Shore Line ....... 369 slides on CD-Rom...**$25.**
