GREAT NORTHERN:

These are from a major First-Class collection of rare GN blueprints. All of these contain tremendous detail of trackage, structures, physical surrounding features, shippers, trackage of foreign RR's, and vicinities in general, made from portions of GN Right-Of-Way and Station Maps, areas of work marked in red. Many of these are VERY large and detailed, folded, priced accordingly. Erased lines of abandoned trackage and facilities prior to the issue date can still vaguely be seen. All originally drawn circa 1900-1918, revised to the dates indicated below. While the work described for each blueprint may sound insignificant, the vicinities of each blueprint are quite large and detailed. All are in a beautiful "whiteline" ink on blue paper, unless noted by "(Bli)" for Blueline on white. "(#x)" indicates more than one of the same blueprint is available for sale. All are near mint to mint See prices below:

GN - B.C. CANADA:
